Our mission is to provide resources, education and expertise to support reforestation work in Haiti with our partners. It starts in the 41 nurseries where harvested seeds are planted with some dirt in small bags and nurtured into seedlings. twice a year, 750 rural haitians fan out across the hills and countryside to plant 200,000 seedlings.

Haiti Reforestation Partnership | We plant trees and good ...

The Haiti Reforestation Project was born out of a need to

rehabilitate the environmental crisis in the country. Estimates suggest that 98 percent of Haiti's forests have been cut. The Republic of Haiti is the least-developed country in the Western Hemisphere and ranks 154th of 177 countries in the UN's Human Development Index (2006).

Haiti Reforestation Project | Challenge | YLTP Program ...
Reforestation in Haiti After a first project conducted from 2016 to 2018 in the southern strip of Haiti to replant cocoa trees following Hurricane Matthew, Reforest'Action is deploying a new reforestation project in Lavial at the end of 2018 in order to develop a family agroforestry activity.

Reforestation in Haiti | Reforest'Action

Eventually, a plan of action was formulated and what the EIU students call “Project Lorax” was born: Families would plant trees in their gardens to promote reforestation while also responsibly harvesting the trees to be able to sell as charcoal. As a result, the parents would be able to pay the school.

Haitian reforestation project promotes sustainability ...
Centuries of man-made deforestation have reduced forest cover from 60 percent to about 2 percent in Haiti. More than 400 hectares of land were reforested through the Green Border project, which is funded by the Norwegian government and promotes South-South cooperation between Haiti and the Dominican Republic.

Reforestation project brings life and growth to Haitian ...

In Haiti, the destructive impact that environmental systems can have is exacerbated due to the lack of protection that native forests and mangrove systems provide. To combat this, Eden Reforestation Projects has been working directly with local community leaders through partnerships, to plant, protect and guard trees to maturity.

Haiti – Eden Reforestation Projects

Reforestation Project. Project Dates: September 2017 - August 2022. In Northern Haiti, deforestation and mangrove loss are putting communities, conservation efforts, and environmental governance at risk. Deforestation in Haiti is driven by a variety of factors — demand for wood-based fuels, high population density, lack of resources in rural areas, and weak enforcement of natural resource regulations.

Restoring Forests in Northern Haiti - Chemonics International
Reforestation is a major challenge for Haiti. Centuries of over-farming and poor agricultural methods have destroyed the region's soil. Erosion makes it very difficult to grow food, and dramatically increases the impact of natural disasters.
