An international team of astronomers reports the discovery of a new super-Earth exoplanet orbiting a nearby M-dwarf star known as Ross 508. The newly found alien world, which received designation Ross ...

Super-Earth exoplanet orbiting nearby star discovered
Planet Labs PBC (NYSE: PL) ("Planet" or the "Company"), a leading provider of daily data and insights about Earth, today announced financial results for its fiscal first quarter for the period ended ...

Planet Reports Financial Results for First Quarter of Fiscal Year 2023
The University of Southern California scientists have shown that the Earth's inner core oscillates. This finding may also help explain the variation in the length of a day.

A novel study suggests that Earth's inner core oscillates
THE ROTATION of the Earth's inner core changes according to a six-year-cycle - one that also shifts the length of a day - a study of seismic waves has confirmed.

Not fixed! Scientists find Earth's core rotation CHANGES and shifts length of a day
