The 2006 IBC Structural/Seismic Design Manual is not meant to establish a minimum standard of care, but, instead, presents reasonable approaches to solving problems typically encountered in structural/seismic design. The example numbers used in the prior Seismic Design Manuals - 1997 UBC and 2000 IBC Volume 2 building design example problems have been retained herein to provide easy comparison to revised code requirements. SEAOC, NCSEA, and ICC intend to update the 2006 IBC Structural ...
