Transmission slipping? | Ford Expedition Forum

2007 Ford Expedition transmission problems with 20 complaints from Expedition owners. The worst complaints are bucking/jerking at deceleration, will not go forward on an incline, and slips out of ...

2007 Ford Expedition Transmission Problems | CarComplaints.com

This is due to the fact that the transmission is starting out in 2nd gear. At speeds over 35 MPH, the engine feels like it's over-revving. This is also due to the fact that the transmission is staying in 2nd gear and the gear ratio provided by 2nd gear is gonna' keep the engine working pretty hard at any speed above 35 MPH.

Part 1 -How Can I Tell What's Wrong with my Transmission ...

If the downshift solenoid fails or has an issue, the vehicle may experience late shifting when slowing down. The transmission may stay engaged in a higher gear for an extended period of time when it should be downshifting. This will cause the engine to over rev, and may put additional unnecessary strain on the engine and transmission. 3.

Symptoms of a Bad or Failing Downshift Solenoid ...

The Ford Explorer 2007 has an "adaptive transmission". When driving in hilly terrain it "learns" very poorly and upon returning to flatter terrain it shifts erratically. It has only 97,000 km /...
