Checking Fuel

Injection Pump

Timing; On Engine.

The timing of the fuel injection pump can be checked and changed if necessary, to make

compensation for movement in the taper sleeve drive or worn timing gears.

The timing can be

Acces PDF 3208

Cat Engine

checked and if necessary, changed using the following method.

3208 – Fuel System Adjustments |

Caterpillar Engines ...

The 3208 uses indirect injection, meaning that the injection pump sets the timing. There is a procedure to check or

Acces PDF 3208

Cat Engine

set the timing. It also could be the advance is not working correctly.

Manual ...

When starting the engine, the force of overfueling spring (14) is enough to

Cat Engine

push thrust collar (15) to the full fuel position. This lets the engine have the maximum amount of fuel for injection when starting. At approximately 400 rpm, carrier and governor weights (17) create enough force to push overfueling spring (14) together.
