new york cars & trucks - by owner "ford expedition ...

The ECU, or engine control unit, is the computer that runs the engine in a Ford car or truck. By modifying the software that runs on the ECU you can increase the power and torque figures of your Ford. Modifying the ECU is called flashing and can be done through a number of methods, from simply plugging in a software ...

How to Program the ECU in a Ford | It Still Runs

The power train control module on a Ford controls every aspect of the vehicle's engine, transmission, clutch and electrical and fuel delivery. Without a properly working PCM, the Ford will not run. At times, you may want to perform a reset of the Ford PCM for basic troubleshooting. This can often resolve small ...
