'Bernard Schutz's textbook A First Course in General Relativity quickly became a classic, notable for its use of the geometrical approach to the subject, combined with a refreshing succinctness. Since its first publication in 1985, the field of general relativity has exploded, with new discoveries in astrophysics and cosmology, and with the successful operation of laser interferometric gravitational-wave antennae.

A First Course in General Relativity by Bernard Schutz

This was our textbook in a course on General Relativity and Cosmology taught by Professor Chien at the University of Minnesota in the early 2000s. Love it. My first exposure to GR in "modern" notation. I first borrowed a copy from the old British Council Library in New Manila when I was in highschool. Good times.
