Sky Diamonds are the the world's first zero-impact diamond (Credits: PA) It took the team more than five years to get the technique right, ensuring they are physically and chemically identical to...

**UK 'sky mining' facility sucks carbon from the air to make ...**

Traditionally diamonds are mined from deep in the Earth – at great human and ecological cost (Image: PA) “Making diamonds from nothing more than the sky, from the air we breathe – is a magical, evocative idea – it’s modern alchemy,” Vince told the Guardian. “We don’t need to mine the earth to have diamonds, we can mine the sky.”

**Eco-friendly diamonds 'made from the sky' to be produced ...**

Dale Vince holding over £1 million worth of Sky Diamonds The company says the process is a way to challenge traditional diamond mining, which causes damage to the planet.

**Eco-friendly diamonds made from the sky - CBC Newsround**

The diamonds are created entirely from materials harvested from the atmosphere, in a process that takes around two weeks to complete. A 'sky mining' facility extracts carbon dioxide from the atmosphere, which is then liquified, purified and mixed with hydrogen split from molecules of rainwater to make methane.

**UK 'sky mining' facility creates carbon-negative diamonds ...**

Diamonds are not only a girl's best friend - they may have found new love from the environment too. Eco-friendly diamonds made from carbon sucked out of the air have been created in the UK. The team behind the project claim it is the world's first zero-impact diamond, using a sky mining facility to extract carbon from the atmosphere, with wind and sun providing the energy, as well as using rain water.
