Unlike the aggregate demand curve, the aggregate supply curve does not usually shift independently. This is because the equation for the aggregate supply curve contains no terms that are indirectly related to either the price level or output. Instead, the equation for aggregate supply contains only terms derived from the AS-AD model.

~~Aggregate Supply: Aggregate Supply and Aggregate Demand ...~~

The aggregate demand curve (AD) assumes that the central bank raises the interest rate in order to combat inflation. For example, if the inflation rate increases, then the central bank will raise the interest rate to reduce consumption and investment, thereby lowering output. The short-run aggregate supply curve (SRAS) represents the inflation ...
