#### Surveys

A survey of agile software development methodologies in Ecuador. Abstract: Agile methodologies have been increasingly used in software development projects worldwide. However, there is little information about the adoption of these methodologies in Latin America. In this paper, we present a study conducted in Ecuador about the use, usefulness and causes of stop using agile methodologies in medium and large organizations.

Agile methods: an introduction - Service Manual - GOV.UK

Longest-Running Agile survey in the World . WHY WE DO IT. Every year, thousands of people are interested in the results of our State of Agile survey. The report gives software professionals deep insight into agile trends, best practices and lessons learned to help them succeed with their agile transformations. The report has become the largest ...

State of Agile Report | State of Agile

The State of Agile is the longest-running report on agile software development, exploring the adoption Page 11/16

and scaling of agile methodologies and usage of agile practices. The report also investigates...

#### 13th Annual State of Agile Survey is Open

A recent survey of development and IT professionals\* shows that agile is now the norm. The majority of development teams and projects now embrace the methodology, while pure waterfall approaches are in the minority. The study consisted of an online survey of 601 software developers and IT professionals. Agile software development entered the scene more than 15 years ago as a reaction to traditional approaches to software development projects.

Agile vs. waterfall: Survey shows agile is now the norm

Agile methodologies are flexible. This is to allow developers to create software in whatever way is most suited to the circumstances that they are faced with. Agile methodologies draw on two...
