Aircraft Landing Gear Drop Test

These drop tests, known as the Approach and Landing Test program, used a modified Boeing 747, known as the Shuttle Carrier Aircraft or SCA, to carry Enterprise to an altitude of 15,000 to 30,000 feet (4,600 to 9,100 m). After a series of captive-flight tests

Experimental Research on Aircraft Landing Gear Drop Test ...

Abstract: The structure of a shock absorber based on magnetorheological (MR) damper with a metering pin is proposed, and structure of the magnetic circuit of MR damper is optimized. By drop tests,
