~~ALKALINE PYROGALLOL SolutionS - Camlab~~

The aquatic plant *Myriophyllum spicatum* produces pyrogallic acid. When in alkaline solution, it absorbs oxygen from the air, turning brown from a colourless solution. It can be used in this way to calculate the amount of oxygen in air, notably via the use of the Orsat apparatus .

~~ALKALINE PYROGALLOL SOLUTIONS~~

Pyrogallol undergoes quick autooxidation in alkaline solution. Due to this property, its alkaline solution is generally used for the removal of oxygen from gases. Pyrogallol may also be used to prepare pyrogallol monomethyl ether via methylation and gallacetophenone via a modified Nencki reaction.

~~What is alkaline pyrogallol solution? What is its use ...~~

Pyrogallol or benzene-1,2,3-triol is a white crystalline powder and a powerful reducing agent. It was first prepared by Scheele 1786 by heating gallic acid. An alternate preparation is heating para-chlorophenoldisulphonic acid with potassium hydroxide. When in alkaline solution, it absorbs water readily, turning purple from a colourless solution.

Read PDF Alkaline Pyrogallol Solution

Pyrogallol reacts with dioxygen in weakly alkaline solutions to form several intermediate products which are electroactive substance and can be detected by electroanalytical methods. The focus here was putted on the effect of pH on the autoxidation rate of some intermediate products produced in pyrogallol autoxidation, which gives sensitive second-order derivative cathodic waves at -0.20 , -0.96 and -1.45 V vs. SCE, respectively.
