9.Layer G formed during which geologic eon/era? (a)Archean (b)Proterozoic (c)Paleozoic (d) Mesozoic 10.Dike L from the first block diagram (page 7) is made of basalt. which can be dated using 235U. 90% of its original 235U. Calculate its absolute age. Take great care with measuring the number of half lives.

Physical Geology - Lab #6 Geologic Time

Answer: In the lab, I observed how convection moves Earth's plates. I also saw how plates interact with each other. When plates move apart from each other at divergent boundaries, magma from the mantle reaches Earth's surface and new crust forms. When plates move toward each other at convergent boundaries, volcanoes, mountains, and trenches form.

How did the lab activities help you answer the lesson ...
