cultural approach. It is based on the concept of a single culture and focuses on the culture of the country where the language is spoken. It does not deal with the learners' own country and the relations between the two. The teaching aim is to develop the so-called native speaker communicative and cultural competence. The approach was dominant until the 1980s and is

Approaches to the study of culture

Socio-cultural approach is based on the idea that the society and culture shape cognition. The values, beliefs and language are all involved in shaping identity and reality. To understand cognitive processes, it takes more than an individual (Kregler et al., 1990). This approach focuses on human development interrelating it to human action.

Transmission of language and culture. Language is transmitted culturally; that is, it is learned. To a lesser extent it is taught, when parents, for example, deliberately encourage their children to talk and to respond to talk, correct their mistakes, and enlarge their vocabulary. But it must be emphasized that children very largely acquire their first language by "grammar construction" from exposure to a random collection of utterances that they encounter.
