Description. ArcSight ESM analyzes and correlates every event that occurs across the organization--every login, logoff, file access, database query--to deliver accurate prioritization of security risks and compliance violations. ArcSight Enterprise Security Manager (ESM) provides a Big Data analytics approach to enterprise security, transforming Big Data into actionable intelligence.

Enterprise Security Manager (ESM) | ArcSight Marketplace

ArcSight ESM leverages the Security Open Data Platform, whose SmartConnectors can connect to 450+ data source types to collect, aggregate, clean, and enrich your data before feeding it into your security analytics. By structuring your data, ESM makes it both more useful and more cost-effective.

ArcSight Enterprise Security Manager (ESM) - Micro Focus

ArcSight ESM extends the reach of Cisco threat management and response, by performing sophis - ticated event correlation of Cisco network events and alerts with a broader set of agency-wide event-sources (systems, databases, and applications). As a result, customers can detect threats in time to take effective action.

ArcSight SIEM - Cisco

This Administrator's Guideprovides information about deploying, configuring, and managing ArcSight Command Center for ESM (ESM for Fusion). Some applications that are deployed in the ArcSight Platform require Fusion, and their individual installation guides might also include instructions for Fusion deployment.

Administrator's Guide for ArcSight Command Center for ESM 7

ArcSight Manager is a high performance engine that manages, correlates, filters, and processes all occurrences of security events collected from the IT System. The ArcSight Manager sits at the center of ESM and acts as a link between the ArcSight Console, ACC, CORR-Engine, and ArcSight SmartConnectors.

HPE ArcSight ESM - Common Criteria

Description. ArcSight is a market leading SIEM, delivering log management and the world's best correlation engine. Using ArcSight, security operations can very quickly identify and respond to known threats, increasing SOC efficiencies and driving efficiencies in an increasingly critical business function. Interset provides a market-leading analytics platform, using unsupervised online machine learning to identify unknown threats like insider threats or targeted outside attacks such as APTs.
