All examples in this revised edition are based on ASP.NET MVC 4, so you'll get full coverage of features such as the Razor view engine, Web Matrix helpers, and improved extensibility.

ASP.NET MVC 4 in Action by Jeffrey Palermo

An action method can be a child or a normal action method, but child actions are action methods invoked from within a view, you cannot invoke a child action method via user request (URL). We can annotate an action method with the [ChildActionOnly] attribute to create a child action. Normally we use child action methods with partial views.

How to Create Child Action Method in ASP.Net MVC

ASP.NET MVC in Action is a comprehensive guide to MVC-based development using this powerful framework. It offers a clearly-written introduction both to the ASP.NET MVC Framework and to the MVC approach. The focus is on creating real, maintainable web applications—so don't expect toy examples and short snippets.
