Rampage IV Extreme Test Setup. Overclocking. This board was much less painful than the Intel board to overclock, primarily because I knew the voltages being applied. At the same voltages being applied. At the same voltages being applied. At the same voltage I chose in he initial 3960X review (1.4-1.41 V), but with LLC this time keeping it steady, this chip gained 200 MHz at the same voltage level.
