BG96 AT Commands Manual - Quectel Wireless Solutions
Quectel Module has an internal TCP/IP stack that is driven by AT commands and enables the host application to easily access the Internet service. It includes TCP service, UDP service, FTP service and HTTP service, etc. This document is a reference guide to all the AT commands and responses defined for HTTP Service.

BG95&BG77 AT Commands Manual - Quectel Wireless Solutions
Quectel is committed to providing all-around support from the development phase to the end of mass production. Even after successful product integration, our customer support team remains available to answer questions via email or telephone. Quectel stands behind our promise to deliver timely and high quality service. It is customer satisfaction that matters the most..

EC25&EC21 AT Commands Manual

Quectel EC2x&EG9x&EM05 modules feature embedded TCP/IP stack, which enables the host to access the Internet directly via AT commands. This greatly reduces the dependence on the PPP and TCP/IP protocol stacks and thus minimizes the cost. EC2x&EG9x&EM05 modules provide the following socket services: TCP client, UDP client, TCP server and UDP server.

EC2x&EG9x&EM05 TCP/IP AT Commands Manual - Sixfab

AT+CSQ AT command returns the signal strength of the device. Possible values are, 0 113 dBm or less 1 111 dBm 2...30 109... 53 dBm 31 51 dBm or greater 99 not known or not detectable. Usage

AT+CSQ – Signal quality / M2MSupport.net

In alarm mode, protocol stack and SIM protocol is closed, only a few AT command can be executed, and system will be powered down after 90 seconds if neither power key is pressed nor functionality is changed to full functionality. If power key is pressed, system will be powered down right now. Confidential Quectel.
