Climate, Complexity and the Politics of Major Regulatory Legislation - David Spence Automatic Prediction Of The Severity

Predicting bug severity. In this paper, we follow an approach based on linear combination of stack traces and categorical features similarity to calculate

similarity of bug reports and predict the severity of an incoming bug report. Given two bug reports (B1, B2) the combined similarity is calculated as follows:(1) $SIM(B1,B2)=\sum i=14wi*f$ eatureiwhere feature1, feature2, feature3and feature4are defined as fo llows:feature1=Similarit yofstacktracesfeature2= {1ifB1.

Automatic prediction of the severity of bugs using stack ...

It is used by developers to prioritize bugs which need to be fixed. The problem is that, for various reasons, bug submitters often enter the incorrect severity level, delaying the bug resolution process. Techniques that can

automatically predict the severity of a bug can significantly reduce the bug triaging overhead.

Automatic prediction of the severity of bugs using stack ...

resolution process. Techniques that can automatically predict the severity of a bug may significantly reduce the bug triaging

overhead. In our previous work, we showed that the stack traces can be used for predicting the severity of a bug with a reasonable accuracy.

Automatic Quantitative Prediction of Severity in Fluent Aphasia Using Sentence Representation Similarity ... prediction, regression models are trained on the extracted features from a subset of the annotated aphasia data. Information-theoretic approaches (Pakhomov et al., 2010)

Automatic Quantitative Prediction of Severity in Fluent ...

Automatic severity assessment and progression prediction can facilitate admission, triage, and referral of COVID-19 patients. This study aims to explore the potential use of lung lesion features in the management of

COVID-19, based on the assumption that lesion features may carry important diagnostic and prognostic information for quantifying infection severity and forecasting disease progression.
