~~Course on Basics of
Physical Chemistry |
Unacademy~~

The atom is the basic unit of chemistry. It consists of a dense core called the atomic nucleus surrounded by a space occupied by an electron cloud. The nucleus is made up of positively charged protons and uncharged neutrons

Access Free Basic Physical

(together called nucleons), while the electron cloud consists of negatively charged electrons which orbit the nucleus. In a neutral atom, the negatively charged electrons balance out the positive charge of the protons.

~~An Introduction of
Some Basic Concept
of Physical ...~~

Chemistry is the branch of science that studies the properties of matter and how matter interacts with energy. Chemistry is considered a physical science and is closely related to physics.

Access Free Basic Physical

Sometimes chemistry is called the "central science" because it is an important part of other major sciences such as biology, Earth science, and physics.
