There is considerable debate about the underlying factor structure of the Beck Hopelessness Scale (BHS) in the literature. An established view is that it reflects a unitary or bidimensional construct in nonclinical samples. There are, however, reasons to reconsider this conceptualization. Based on previous factor analytic findings from both clinical and nonclinical studies, the aim of the ...

Construct validity of the beck hopelessness scale (BHS ...

Construct validity of the Beck Hopelessness Scale (BHS): A multitrait–multimethod approach Hopelessness is part of the cognitive triad of depression (Beck, Rush, Shaw, & Emery, 1979), and has been defined as a system of negative beliefs and expectancies concerning oneself and one’s future (Stotland, 1969).

Running head: BECK HOPELESSNESS SCALE

Beck Hopelessness Scale (BHS) The BHS is composed of 20 dichotomous “true/false” items that aimed to assess three major aspects of hopelessness: feelings about the future, loss of motivation, and expectations. Total scores were created by first reverse-coding nine items (items 1, 3, 5, 6, 8, 10, 13, 15, 19) and then summing the item scores.

Further Insights Into the Beck Hopelessness Scale (BHS ...

Previous studies showed that hopelessness was an important risk factor for suicide. Aims: This study aimed to evaluate the reliability and validity of the four-item Beck Hopelessness Scale (BHS-4) in psychological autopsy study among Chinese rural elderly.

Previous studies showed that hopelessness was an important risk factor for suicide. AIMS: This study aimed to evaluate the reliability and validity of the four-item Beck Hopelessness Scale (BHS-4) in psychological autopsy study among Chinese rural elderly. METHOD: Two-stage stratified cluster sampling method was used to select research sites.

Reliability and validity of short Beck Hopelessness Scale ...

The Beck Hopelessness Scale (BHS) is the most widely used measure of hopelessness in different clinical populations, including patients with advanced and terminal cancer.^{21, 22, 23} Yet, the conceptualization of hopelessness underlying the BHS items (i.e., a cognitive pattern with negative expectations about one's self and the future) causes potential problems in populations with advanced illness. ²⁴ In patients with limited life expectancy, items expressing uncertainty regarding the future ...

Dimensionality, Stability, and Validity of the Beck ...

Construct validity was established by assessing the correlations of the BHS sum score and the Fragebogen zur Lebenszufriedenheit (FLZ-8) [Life satisfaction questionnaire] and a brief assessment of depressive symptoms: Patient Health Questionnaire (PHQ-2) as well as the Beck Scale for Suicide Ideation (BSS).

Psychometric properties and measurement invariance of the ...

METHODS: The Beck Hopelessness Scale, reasons for living inventory, and the suicide behaviour questionnaire were applied in patients with suicide risk attending the psychiatric clinic and the emergency department. A new assessment was made 30 days later to determine the predictive validity of suicide or suicide attempt.

Beck Hopelessness Scale Construct Validity Of The Beck

The Beck Hopelessness Scale is a 20-item self-report inventory developed by Dr. Aaron T. Beck that was designed to measure three major aspects of hopelessness: feelings about the future, loss of motivation, and expectations. The test is designed for adults, age 17–80. It measures the extent of the respondent's negative attitudes, or pessimism, about the future. It may be used as an indicator of suicidal risk in depressed people who have made suicide attempts. The test is multiple choice ...

Beck Hopelessness Scale - Wikipedia

The hopelessness scale is valid, and differentiates depressive patients from control subjects. The scale has a good reliability (test-retest, $r = .81$) and a good internal consistency ($\alpha = .97$)...

(PDF) Study of Beck's hopelessness scale. Validation and ...

ABSTRACT Background: The Beck Hopelessness Scale (BHS), as the most globally utilized measure of hopelessness, has been recognized to be very useful in the prediction of suicide. Its psychometric properties in terms of its factor structure, validity and reliability has not been examined among Nigerian student nurses.

The Beck Hopelessness Scale: Factor structure, validity ...

This study aimed to evaluate the reliability and validity of the four-item Beck Hopelessness Scale (BHS-4) in psychological autopsy study among Chinese rural elderly. Method: Two-stage stratified cluster sampling method was used to select research sites.

Reliability and validity of short Beck Hopelessness Scale ...

The aim of the present study was to examine the construct and cross-cultural validity of the Beck Hopelessness Scale (BHS; Beck, Weissman, Lester, & Trexler, 1974). Beck et al. applied exploratory Principal Components Analysis and argued that the scale measured three specific components (affective, motivational, and cognitive).

The Beck Hopelessness Scale | European Journal of ...

The BDI test is widely known and has been tested for content, concurrent, and construct validity. High concurrent validity ratings are given between the BDI and other depression instruments as the Minnesota Multiphasic Personality Inventory and the Hamilton Depression Scale; 0.77 correlation rating was calculated when compared with inventory and psychiatric ratings. The BDI has also showed high construct validity with the medical symptoms it measures. Beck's study reported a coefficient alpha ...

Beck Depression Inventory (BDI) - Statistics Solutions

Construct validity of scale was supported by significant correlations with the family caregivers' scores on the Zarit Burden Interview, mini international neuropsychiatric interview suicidality module, General Health Questionnaire-12 (GHQ-12), and Patient Health Questionnaire-9.

Psychometric Properties and Correlates of the Beck ...

Hopelessness has been measured in clinical and population research in a variety of ways including systematic interviews 9 and validated psychometric measures such as the Beck Hopelessness Scale (BHS) 10 and the Mental Adjustment to Cancer scale. 11 There is great pressure in large-scale population studies on questionnaire size due to the volume of clinical and demographic variables that must be collected.
