**The 12 Best Practices in Contract Management**

The framework is a good practice guide for managing a broad range of contracts. It is particularly relevant for contracts where services are delivered over a long period of time (five years plus) where customers need to ensure that service levels and value for money are maintained over the duration of the contract. The framework outlines the activities that organisations should consider when planning and delivering contract management.

**Good practice contract management framework** - National -

This good practice framework defines the four blocks – structure and resources, delivery, development, and strategy – comprising 11 areas (Figure 1) that organisations should consider when planning and delivering contract management. It outlines the key activities that fall under each of the 11 areas. Figure 1.

**Good practice contract management framework**

Here, we discuss 13 best practices that will help you establish the right systems and checks in place and reap the benefits of meticulous contract management. 1. Standardize Contract Creation . The impact of poorly drafted contract documents can be severe—companies could lose millions and reputational damages could jeopardize their customer base.

**13 Best Practices for Contract Management** - EcoSys

The foundations for effective and successful contract management rely upon careful, comprehensive and thorough implementation of pre-award activities. The focus should be on why the contract is being established and on whether the supplier will be able to deliver in service and technical terms.

**Commercial capability: contract management standards** - GOV.UK

But at some point, you will need to change your contract management process and adopt new best practices. You can proactively monitor your firm's performance with reporting in HighQ and easily change your workflows to make improvements. Doing this on a regular basis will help you catch issues before they become costly problems.

**Best practices for contract management with HighQ**

1. Centralise contracts and documents. Visibility should underpin your entire approach to contract management. When your contracts are kept in different locations - from spreadsheets to shared drives - or when team members are in different locations and can't access the information they need, problems start to occur.

**Five contract management best practices for your business**

An important best practice to protect your contracts from unauthorized users is to encrypt all your document data. You'll want to encrypt information both at rest and in transit using the latest AES 256-bit encryption and TLS 1.2 standards. Data at rest refers to any data that is stored within your contract management system.

**5 Security Best Practices for Contract Management** -

A contract manager must have the necessary legal knowledge and training to handle the contract management process in an accurate manner. The precise wording is one of the most critical aspects of contract management and should be handled with care to maximize profitability and minimize risks.
