10–1 Cell Growth. 3. Limits to Cell Growth.  
•The larger a cell becomes, the more demands the cell places on its DNA. In addition, the cell has more trouble moving enough nutrients and wastes across the cell membrane. –The rate at which food, oxygen, water, and wastes are moved in and out of the cell is dependent on the surface area of the cell.

10.1 Cell Growth, Division, and Reproduction  
Lesson Objectives Explain the problems that growth causes for cells. Compare asexual and sexual reproduction. Lesson Summary Limits to Cell Size There are two main reasons why cells divide: Information "overload": The larger a cell gets, the more demands it places on its DNA.
