Chapter 12 Forces and Motion Summary 12.1 Forces A force can cause a resting object to move, or it can accelerate a moving object by changing the object's speed or direction. □Aforce is a push or a pull that acts on an object. One newton is the force that causes a 1-kilogram mass to accelerate at a rate of 1 meter per second each second.

nuclear, and gravitational forces. All the universal forces act over a distance between particles of matter, which means that the particles do not need to be in contact with one another.

~~Chapter 12: Forces and Motion~~

Chapter 12: Forces. Describe (what does it say and what is it commonly called) Newton's First law of Motion: Law of Inertia. Object in motion stays in motion or an object at rest stays at rest UNLESS acted on by a FORCE. Newton's Second law of Motion: $F=ma$. Force equals the product of an object's mass and acceleration.

~~Chapter 12: Forces in Motion—Unatego~~

CHAPTER 12 FORCES AND MOTION 12.1 FORCES 2. 12.1
FORCE There are 4 distinct forces in our universe: Gravitational, electromagnetic, strong nuclear and weak nuclear forces. Ex: everyday force – wind Force – is a push or pull that acts on an object. A force can cause a resting object to move, or it can accelerate a moving object by changing the object's speed or direction.
