totally new innovations will help the industry transform. CEP: April 2019

CEP Magazine | AIChE

Chemical Engineering Progress (CEP) is the flagship publication of the American Institute of Chemical Engineers (AIChE), the world's leading organization for chemical engineers. Over 32,000 professionals receive the magazine each month. According to CEP's latest demographic statistics, nearly 85% of these influential readers work in industry, with the rest employed in academia and government.

The types of roles chemical engineers work within. Chemical engineers can work within a number of different roles in the pharmaceutical industry, as they are needed at every stage of a number of processes. Some of these include: Process Engineering / Plant Engineering; Product Development (device) Research and Development; Testing/ Quality Control

Chemical engineering within the pharmaceutical industry ...

Chemical Engineering Progress (CEP), AIChE's flagship member magazine, is written and edited by chemical engineering professionals for chemical engineering professionals. Every month, CEP publishes tutorial articles that provide "how-to" guidance and best practices on a wide variety of chemical engineering topics, as well as news on the latest developments in chemical engineering technology and cutting-edge research.

Main Content. Chemical engineering is a discipline influencing numerous areas of technology. In broad terms, chemical engineers conceive and design processes to produce, transform, and transport materials – beginning with experimentation in the laboratory followed by the implementation of the technology in full-scale production. Chemical engineers are in great demand because of the large number of industries that depend on the synthesis and processing of chemicals and materials.
