[eBooks] Chemistry Experiments For Instrumental Methods
Instrumental Methods in Chemistry. Course Description:
Quantitative analysis is a one-year course in chemistry offered to junior and senior students that emphasizes quantification of substances based on wet-chemical methods and modern instrumentation techniques. Topics will include statistics, sampling strategy, gravimetry, multiple chemical equilibria, titrimetry, potentiometry, voltammetry, absorbency and fluorescence spectroscopies, gas and liquid chromatographies, and capillary ...

About this title. The only self-contained modern laboratory manual for advanced undergraduate courses in instrumental analysis. Consists of over 50 experiments demonstrating the theory and practice of electrochemical methods, methods based on electromagnetic radiation, and separation methods. Experiments are introduced with a review of the physical principles on which the experimental procedures are based.

9780471893035: Chemistry Experiments for Instrumental ... on instrumental methods, covering modern methods of ionisation (including ESI and MALDI) and mass analysis (including orthogonal TOF and FT-ICR) and the use of linked methods such as GC/MS, HPLC/MS and tandem mass spectrometry. Practical
