The Belvedere Centre — Optimum Health Care

Firstly, what is Osteopathy ? Osteopathy is an alternative medical technique that uses manipulation and massage to help distressed muscles and joints to help them work smoothly. Treatment can improve many parts of the body by restoring normal movement in areas that have become dysfunctional. This can then allow the tissue to nourish, replenish and!

HOW CAN OSTEOPATHY & KINESIOLOGY HELP WITH PAIN? — BACK —

Manual therapeutic approaches (which include Osteopathy, Chiropractic, Physiotherapy, Osteomyology, Muscular Skeletal Therapy, Applied Kinesiology and many others) are designed to improve mechanical and muscular skeletal problems. The focus is specifically on joint and muscle function but different approaches are needed to achieve results.

John Taberman Pichler | Osteopathy & Applied Kinesiology

Chiropractic kinesiology is a form of alternative medicine using manual muscle testing to identify unbalanced electrical signals from the brain. It is based on how muscles communicate with organs and other muscles in the human body. While asking specific questions, a chiropractic kinesiology specialist might identify a chemical, emotional, or electrical cause of illness linked to weakened muscular strength.

What Is Chiropractic Kinesiology? (with pictures)

Chiropractors are registered with the General Chiropractic council and Dr Pitman is also a member of the United Chiropractic Association. He also has a Kinesiology, Gym Fitness Instructor and Sports Massage Therapy and Rehabilitation qualification. This gives him a unique combination of skills to help promote optimal health for his patients.

Chiropractor in Stoke | Peak Chiropractic and Kinesiology —

Chiropractic, Physiotherapy and Osteopathy are primary health care professions concerned with the diagnosis, treatment and prevention of musculoskeletal disorders. Here at Dyer St Clinic in Cirencester, our team are experts in treating patients with a wide range of injuries and musculoskeletal issues. Often an injury can be caused by the most seemingly innocuous actions; bending down to tie up a shoelace, reaching up to a high shelf or exercising without adequately preparing one's body.
