Choked Flow Of Gases Okcc Choked Flow of Gases When the air velocity reaches sonic velocity (P2/P1 = 0.528) further increases in P1(upstream pressure) do not cause any further increase in the air velocity through the orifice. Conse- quently it is wrongly concluded that the mass flow rate also does not increase. Choked Flow of Gases - okcc.com

Online Library Choked Flow Of Gases Okcc Com Choked flow - Wikipedia The conservation of mass is a fundamental concept of physics. Within some problem domain, the amount of mass remains constant; mass is neither created or destroyed. The mass of any object is simply the volume that the object occupies times the density of the Page 14/29
