The main differences between Routing and Switching are as below. The function of Switching is to switch data packets between devices on the same network (or same LAN - Local Area Network ). The function of Routing is to Route packets between different networks (between different LANs - Local Area Networks ). Switches operate at Layer 2 of the OSI Model (Datalink Layer).

With the 200-125 CCNA Routing and Switching exam that launched in mid-2016, Cisco made some much-needed changes to steer the certification away from topics covered in previous exams, such as frame relay, and focus more on modern routing and switching technologies. A few of the major changes included an added emphasis on cloud computing and supplementary network services, such as DNS, Dynamic Host Configuration Protocol (DHCP) and Network Time Protocol (NTP).
