WINNER OF THE EDWARD STANFORD CHILDREN'S TRAVEL BOOK OF THE YEAR 2022 A SUNDAY TIMES CHILDREN'S BOOK OF THE WEEK Dive beneath the waves with this spell-binding adventure of friendship, forgiveness and bravery, set on the shores of Papua New Guinea, perfect for fans of Katherine Rundell and Eva Ibbotson. "I want to be able to call the sharks. Teach me the magic and show me the ways." Blue Wing is desperate to become a shark caller, but instead she must befriend infuriating newcomer Maple, who arrives unexpectedly on Blue Wing's island. At first, the girls are too angry to share their secrets and become friends. But when the tide breathes the promise of treasure, they must journey together to the bottom of the ocean to brave the deadliest shark of them all... "The most incredible story...tender and wise, with themes of friendship, love, grief, revenge and acceptance." Michelle Harrison "Magnificent and beautiful." Sophie Anderson

If we lived in a liquid world, the concept of a "machine" would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of "being alive." Liquid life references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, "brute" materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a "new materialist" and "liquid" study of matter, it conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. Liquid Life seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for exploration: Rolf Hughes' "angelology" of language explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing. Liquid Life reunites us with the irreducible "soul substance" of living things, which will neither be simply "solved," nor go away. Rachel Armstrong is Professor of Experimental Architecture at Newcastle University (UK), and has also been a Rising Waters II Fellow for the Robert Rauschenberg Foundation (April-May 2016), TVOTY futurist in 2015, Fellow of the British Interplanetary Society, and a Senior TED Fellow in 2010. She is also the coordinator of the Living Architecture project, an EU-funded project that establishes the principles for our buildings to share some of the properties of living things, e.g. metabolism, operating at the intersection of architecture, building construction, bio-energy and synthetic biology. She is also the author of Vibrant Architecture (De Gruyter, 2015), Star Ark: A Living, Self-Sustaining Spaceship (Springer, 2017), and Soft Living Architecture: An Alternative View of Bio-Informed Design Practice (Bloomsbury, 2018).

Who's Epossumondas? Why, he's his mama's and his auntie's sweet little patootie, that's who. He's also the silliest, most lovable, most muddleheaded possum south of the Mason-Dixon line! Better choose your words wisely when he's around, 'cause otherwise you never know what you'll get. Epossumondas just might bring you a fist full of crumbs, or a soaking wet puppy, or a scruffy wad of bread—oh, you just wouldn't believe it! Renowned storyteller Coleen Salley and Caldecott Honor illustrator Janet Stevens team up for this outrageous twist on the Southern story of the noodlehead who takes everything way too literally. (Or is that Epossumondas just pulling his mama's leg?)

Play is one of humanity's straightforward yet deceitful ideas: though the notion is unanimously agreed upon to be universal, used for man and animal alike, nothing defines what all its manifestations share, from childish playtime to on stage drama, from sporting events to market speculation. Within the author's anthropological field of work (Mongolia and Siberia), playing holds a core position: national holidays are called "Games," echoing in that way the circus games in Ancient Rome and today's Olympics. These games convey ethical values and local identity. Roberte Hamayon bases her analysis of the playing spectrum on their scrutiny. Starting from fighting and dancing, encompassing learning, interaction, emotion and strategy, this study heads towards luck and belief as well as the ambiguity of the relation to fiction and reality. It closes by indicating two features of play: its margin and its metaphorical structure. Ultimately revealing its consistency and coherence, the author displays play as a modality of action of its own. "Playing is no 'doing' in the ordinary sense" once wrote Johan Huizinga. Isn't playing doing something else, elsewhere and otherwise ?

In a bravura feat of storytelling, Mark Haddon calls upon narratives ancient and modern to tell the story of Angelica, a young woman trapped in an abusive relationship with her father. When a young man named Darius discovers their secret, he is forced to escape on a boat bound for the Mediterranean. To his surprise he finds himself travelling backwards over two thousand years to a world of pirates and shipwrecks, of plagues and miracles and angry gods. Moving seamlessly between the past and the present, Haddon conjures the worlds of Angelica and her would-be savior in thrilling fashion. As profound as it is entertaining, *The Porpoise* is a stirring and endlessly inventive novel from one of our finest storytellers.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

This book investigates nominal determination in Old English and the emergence of the definite and the indefinite article. Analyzing Old English prose texts, it discusses the nature of linguistic categorization and argues that a usage-based, cognitive, constructionalist approach best explains when, how and why the article category developed. It is shown that the development of the OE demonstrative 'se' (that) and the OE numeral 'an' (one) should not be told as a story of two individual, grammaticalizing morphemes, but must be reconceptualized in constructional terms. The emergence of the morphological category 'article' follows from constructional changes in the linguistic networks of OE speakers and especially from 'grammatical constructionalization' (i.e. the emergence of a new, schematic, mostly procedural form-meaning pairing which previously did not exist in the construction). Next to other functional-cognitive reasons, the book especially highlights analogy and frequency effects as driving forces of linguistic change.

Many Jewish families helped settle, diverse communities in the desolate, desert terrain of the wild west. Sweet Tamales for Purimis told from the perspective of Rachel, a young girl, who along with her new friend, Luis plan to create a Purim festival for their town. Their plans for the festival were well underway until the family goat, Kitzel, ate all of the traditional holiday pastries, Hamantashen. Fortunately, Rachel and Luis are determined to find another way to celebrate Purim and the family is able to share their cultural and religious traditions with their new neighbors.

This book is a guide for managers, Scrum Masters and agile coaches who are interested in agile organizational methods and who are planning to introduce Scrum at their own company. Scrum is not only a product development framework but can also be used to structure activities for agile and lean organizational development. Divided into five major parts, the book first introduces and defines the Scrum Culture. It explains its relevance, highlights a number of pain points typical for first encounters with Scrum, and embeds it in an introduction to organizational change. This is complemented with many real-life examples that help to apply the concepts to readers' own specific contexts. The second part describes the principles of introducing Scrum in detail, while the third part embarks on the practical application of these principles, drawing on a wealth of experience gathered in many successful introduction projects. Part four focuses on a detailed case study of a Scrum transformation before part five provides, in closing, a number of appendices offering extensive information on Scrum and its principles.
