Coal to Diamonds is the life story (so far) of someone who has thrived and made a place for herself in this world when there were so many circumstances stacked against her doing so. She is a fierce protector of those she loves, a fighter, a feminist, and a voice for a generation of misfits, queers, punks, and especially femmes who will not be silenced or made to feel ashamed for who they are.

Conversion of coal to diamonds is a natural process that takes millions of years. Even though there are carbon atoms in coal, the amount of impurities are so high, that it takes millions and millions of years for the coal to transform to its nearly purest form - graphite. The conversion of graphite to diamonds takes some more millions of years.

How Does Coal Become a Diamond? Excavating the Truth ...

Many people believe that diamonds are formed from the metamorphism of coal. That idea continues to be the "how diamonds form" story in many science classrooms. Coal has rarely - if ever - played a role in the formation of diamonds. In fact, most diamonds that have been dated are much older than ...

Diamonds are formed when carbon is under an immense amount of pressure and heat. The carbon atoms found in coal are squeezed and heated, and then pushed toward the earth's surface, where they cool and become diamonds. Plants are the source material for coal, and most diamonds are much older than the earth's first land plants.

How Much Pressure Does It Take to Make a Diamond From Coal?

COAL INTO DIAMONDS is my story - growing up feeling like you are on the margins of society and struggling to find your place. My memoir talks directly to disenfranchised, misunderstood kids everywhere' Beth Ditto is known for her remarkable voice (which has been compared to Etta James and Janice Joplin), her talent ('fuckin immense' - Noel Gallagher) and her forthright rejection of what a pop singer should look like.
