Working of LCD with CORTEX M3

Cortex M3 User Manual ST's ultra-low-power MCU platform is based on a proprietary ultra-low-leakage technology and optimized design. STM32 ultra-low-power microcontrollers offer designers of energy-efficient embedded ...

STM32 Ultra Low Power MCUs
The NL6621 WiFi SOC is powered by a
160 MHz ARM Cortex-M3 with 448 KB
of RAM, and everything else is integrated
in the SOC. The module has 32 GPIOs,
SPI, I2C, I2S digital audio, and most of
the ...

ESP8266 Killer?

For a few bucks, you can't complain about the hardware. The STM32F103C8T6 onboard is a Cortex-M3 processor that runs at 72 MHz. There's 64K of flash and 20K of RAM. There's a Page 9/13

minimicro-USB ...

The \$2 32-Bit Arduino (with Debugging)
This includes the wristband, enclosure,
32-bit ARM Cortex-M3, 32-MHz CPU ...
including interactive eyeglasses providing
employees with manuals, real-time data
