CREATE Rotator Specification
The create RC5-3 is a medium duty rotator ideal for medium sized HF antennas and VHF/UHF arrays. It uses the same type of control box as the RCA5-3 which shows the rotator direction and has CCW/CW and Speed controls as well as a Preset control.

RC5 Reliable for many years Time Owned: more than 12 months. My first review on this rotator was in 2006. My first RC5A-p is many years in use and still rotating a big stack of yagis, the second one is in use since 2 years and I just got the third one. The fourth one is a ERC51 elevation rotator.

1) Create a new device using the "Create a new device" button and select "Connector". Choose a new virtual port number, for example COM3. 2) In the same way, create a new device by selecting "TcpClient". Enter the "Remote TCP host address" and "Remote TCP port" you defined in the Arduino rotator_settings file.
