In Creo Parametric, the parametric part modeling process involves the following steps: 1. Set up Units and Basic Datum Geometry. 2. Determine the type of the base feature, the first solid feature, of the design. Note that Extrude, Revolve, or Sweep operations are the most common types of base features. 3.

Creo Simulate 3.0 In this course, you will learn how to test, validate, and optimize product designs with the Creo Simulate module. Creo Simulate enables you to simulate structural and thermal loads on product designs. You will complete comprehensive, hands-on lab exercises that simulate realistic analysis and design optimization activities.
