Microwave and Digital communication Lab 4 PCM Operation (with DC input) Modulation: 8. Set DC source to some value say 1 V with the help of multimeter and connect it to the A/D converter input and observe the output LED's. 9. Note down the digital code i.e output of the A/D converter and compare with the theoretical value Theoretical value can be obtained by: A/D input voltage \_\_\_\_\_ = X (10 ...

Click the Semiconductors tab and pick and place an NPN transistor on the centre of the page. Double click the transistor and set the part no. as BC107. 2. Next, click the Basic tab and pick and place resistors, capacitors, battery and the signal generator in convenient locations following the schematic of Fig. 1.
