A1.1 we can see that the "Epoxy Resin" project has a payback period of 1.5 years while Synthetic Resin has a longer payback period of 2.5 years.

~~The Dilemma at Day Pro — 1550 Words | Bartleby~~

The Dilemma at Day-Pro. decision criterion is to accept the project if the PI is greater than or equal to 1.00. Since both projects are greater than 1 then the project with higher PI will be accepted, which is the Synthetic Resin. Yes, this measure can help solve the dilemma. Although the NPV measures the absolute desirability of a project, the profitability index provides a relative measure of an investment proposal's desirability.
