We took our floater in to the local International dealer to get a few leaks fixed and have new king pins installed. Most of the leaks were above the transmission, its an Allison. They found some hoses leaking. They also found the front cover was cracked, it was a \$1400 cover, and took 20 hours to replace.

DT 466 ENGINE OIL PUMP. from John Whelan Plus . 6 years ago. This video is all about a repair our shop did on a DT466E International diesel engine. It would not start and we finally found the engine oil pump to be weak along with a scored oil pressure regulator. The engine oil pump feeds the 'high pressure oil pump' that runs the HEUI system.

Another note on DT466 sudden oil leaks. Think about changing the little metal oil feed line from the block to your air compressor. The little flares on the ends of these tubes have a tendency to wear thin thus allowing the line to slide through the brass fittings and spewing oil all over the place, and if you're driving along when this happens you won't even know you're losing engine oil
