Benches & Seats | Earth Anchors Ltd

An earth anchor is a device designed to support structures, most commonly used in geotechnical and construction applications. Also known as a ground anchor, percussion driven earth anchor or mechanical anchor, it may be impact driven into the ground or run in spirally, depending on its design and intended force-resistance characteristics. Earth anchors are used in both temporary or permanent ...

Ground Anchoring Systems Supplier: Anchor Systems ...

Product description Spyra-Base ground anchors are the ideal heavy duty screw-in awning peg system for larger awnings, marquees and larger tents with heavy canvas. Securing firmly and deeply into the ground they also provide a quickly-installed security point on-site for locking generators, bicycles and other equipment.

Ground anchors: Amazon.co.uk: Garden & Outdoors

The anchors are re-usable, very straight forward and quick to install or remove. With 4 diameters, 4 styles, many length options and a large range of brackets, there is a solution for almost any situation. When the anchors are hammered, they automatically rotate, cutting a highly accurate thread in the ground - hence their high holding power.

Tables - Picnic & Tri-tables | Earth Anchors Ltd
Installation is totally straight forward, here's how the standard
Hellanker™ anchors are used. Using a sledge hammer (or club hammer for
small anchors), force the anchor into the ground, it will rotate when
hit and cut a precise thread in the ground. Continue until close to or
at ground level.

A prestressed grouted ground anchor is a structural element installed in soil or rock that is used to transmit an applied tensile load into the ground. Grouted ground anchors, referenced simply as ground anchors, are installed in grout filled drill holes. Grouted ground anchors are also referred to as “tiebacks”.
