Empower Software Intended use Use the Waters Empower 2 Software for acquiring, processing, reporting, and managing your chromatographic information. Safety information See the operator's guides of the instruments or devices associated with this software product for information on how to safely operate and maintain them. Waters contact information:

Empower 2 Installation and Configuration Guide

Oracle client software provides Empower 2 software with access to the Empower database through TCP/IP. System administration Managing the Empower 2 Enterprise or Workgroup system involves maintaining all the hardware components, operating system software, networking software, and application programs that make up the Empower 2 software.

Empower 2 System Administrator's Guide

Empower 2 software allows the use of Wizards to ensure proper processing as well as built in restrictions related to the order of processing data. In order to access the Empower 2 system, individuals must have a user account. This account will define the capabilities that user will have on the system.

Empower 2 Software - Waters Corporation

Empower software offers two methods of peak detection and baseline determination: • ApexTrack integration - Detects a peak at its apex using the second derivative of the chromatogram. Peak detection parameters are independent of baseline location parameters. The baseline of each peak is determined using the Liftoff% and Touchdown % parameters.
