Energide Auto - kropotkincadet.ru

As a reference unit for climate plans, a tonne of carbon dioxide remains an abstract notion for most of us.. What is CO₂? Carbon dioxide is an invisible, odourless and colourless gas. This does not prevent it, like the air, from having a mass: 1,964 g/litre or 1.964 kg/m³. These equivalents will help you understand the scales we're talking about when discussing one tonne of CO₂:

What exactly is a tonne of CO₂? – Energide

This site is dedicated to educating green home buyers on: How the Ontario Building Code "Energide 80 amendments" enable builders to bypass Energide 80 testing How Energide modelling software lumps all insulation types together - even though not all measure up in cold Canadian climates Why new home buyers should focus on actual energy efficiency...

The EnerGuide label The distinctive EnerGuide label is a familiar sight to most Canadians. We see it when we shop for new appliances, look at the literature for a new furnace or read the fine print on a light bulb package. The EnerGuide label lets us know how much energy a product uses and how that compares to similar models.

The EnerGuide label - Natural Resources Canada

An EnerGuide Rating Label, which rates your home's energy consumption and compares your home's performance to a typical new house. The label will also show you the proportion of energy consumed by your home's heating, cooling, ventilation and other equipment and appliances.
