my B14 175 engine. In the manual it shows there is a washer ...

Engine Rebuild - BSA_Bantam_Club

BSA Bantam D7- 1960 Engine Rebuild The following article covers off my restoration of one of three
of my D7 BSA Bantam Engines. This is my second, and spare engine. Bought via a post on the owners
club FB page.

BSA Bantam D7- 1960 Engine Rebuild

The BSA manual specifies an end gap of .009" (minimum) .013" (maximum). If the end gap is .007" or
less, the ends must be filed carefully to obtain the correct minimum gap. When refitting the piston to the
conrod it is most important to have the piston ring gaps at the front, ie numbers one and three will appear
nearest the front on the nearside of the engine, as below:

Engine rebuild - BSA Bantam D7 Super

On a Bantam with +ve or chassis as the earth, you can connect the red wire directly to the chassis.

Read Online Engine Rebuild Bsa Bantam Club

However it is usually best to connect a wire directly from that same connection to the battery +ve. It is also advantageous to put a fuse in series with the live (-ve) connection from the battery to the wiring loom, just in case!

Bsa Bantam Engine for sale in UK | View 19 bargains

The debates on mixtures are interesting but rather unnecessary on an engine with such a limited power output, Ok for the bantam racer/trials lads I suppose. The D10 D14/4 and B175/Bushman were a quicker bike but the D14/4 did not have a good reputation for reliability back in the early 70's, it had a reputaion of wearing big end bearings, this improved with the production of the B175.

BSA Bantam Engine for sale | eBay

Knock back the locking washer then undo the large sprocket nut (left-hand thread!). Remove the drive sprocket from the splines of the main-shaft. Here's a tip: wrap the chain around the sprocket and clamp it in a vice (or mole wrench) to enable the nut to be undone! Next remove the final drive oil seal assembly.

Engine stripdown - BSA Bantam D7 Super

The BSA Bantam used a two-stroke engine so there was no need for an oil tank. Consequently the Bantam's right-hand side panel was almost a mirror-image of the left-hand battery box cover. However, the Tiger Cub engine is, of course, a dry-sump four-stroke so an oil tank was needed.
