Abstract. We present an inquiry-based, hands-on laboratory exercise on enzyme activity for an introductory college biology course for science majors.

We measure student

Online Library Enzyme Activity Guided Inquiry Lab

performance on a series of objective and subjective questions before and after completion of this exercise; we also measure performance of a similar cohort of students before and after completion of an existing,

Online Library Enzyme Activity Guided Inquiry Lab

standard, “direct” exercise
over the same topics.

Can an Inquiry Approach Improve College Student Learning ...
