Basic Excel formulas & functions with examples
Range in Excel is the difference between the maximum limit and minimum limit of the available numbers in excel. For example, we have around 10 different number of randomly selected in a list in Excel. To calculate the Range for these numbers, first, we need to find the upper and lower values using MAX and MIN function in the list of those cells. Once we get the maximum and minimum values out of those numbers, then subtract the Max value from Min value.
