fall garden mature before frost, you'll need to get it started in mid-summer. That means late July to August, depending on your zone. Many plants will grow well in cool weather, but they need to be started while it is still a bit warm and the days are longer. Fall vegetable gardens are often just an extension of summer succession planting. As one plant is finished, another vegetable is planted in its place.

Best Vegetables for a Fall Garden - The Spruce
When selecting varieties for your autumn vegetable garden, make sure to look at their growing requirements. Then, choose the ones that have the shortest number of days to maturity. For example,

Broccoli, Brussels sprouts, cabbages, kale, leeks and parsnips are hardy vegetables and will stand through the winter. Leafy crops such as chard, parsley and rocket should also over-winter with a little protection. Other crops such as carrots, onions, turnips and winter squash can also be grown to enjoy in winter if stored correctly.

Vegetables: growing for winter / RHS Gardening
The winter garden needn ' t be devoid of life. On the contrary, it can be home to an array of winter crops that provide fresh ingredients for seasonal meals. Robust vegetables like kale, Brussels sprouts, beetroot and turnips shrug off the worst of the weather, with no
