Chrysler flathead engine -  
Wikipedia

The Chrysler Flathead six-cylinder engine series was an L-head motor that was used in Chrysler vehicles from 1953 to 1960, and later used in applications such as airport tugs, baggage handling carts and certain types of large stationary hauling machinery into the early part of the 1970s.

Performance Upgrades for the  
Chrysler Flathead 6 Engine ...  
I have a 6 cylinder flathead engine for a Plymouth. It is the 23 smaller engine and I think it would be correct for 52 and earlier Plymouth and Mopars with this engine. The larger 25 that was used in the bigger Mopars is

MOPAR inline flathead engines -  
Crankshaft Coalition  
Modern performance FORD  
FLATHEAD ENGINES are still hot  
rodded today, with a special land  
speed record class for flathead  
engines. The current record  
holder achieves 700 hp (525 kW)  
and 300 mph (483 km/h). N Note  
that on one pass the car broke  
300 mph (480 km/h) but did not  
set a record. Two passes have to  
be made in order to break the  
record.

Flathead City Home Page  
Industrial versions of the  
venerable flathead continued to  
appear through the 1970s, and  
the Power Wagon was produced  
for export markets until 1978.

The 25-inch engine remains very much a part of the American collector-car scene.

Chrysler's Long-Block Flathead-Six | Hemmings

Mopar flathead engines were manufactured at a time when the technology of engine oil was still primitive, by today's standards. Much of the wear restorers encounter upon disassembly is the result of the poor state of available lubricants. The oil we buy and use today is light years ahead of that available fifty years ago.

Auto

Almost all flathead engines had aluminum pistons with a 4 ring design; the top two being compression and the bottom two oil control. From 1935 through 1940 both compression rings were 1/8 inch thick (.125") and the oil control rings were 5/32 of an inch (.15625"). In 1941, the top compression ring was changed to 3/32 of an inch (.09375").
