Mopar Engine

The Chrysler flathead engine is a flathead automotive engine manufactured by the Chrysler Corporation from 1924 through the 1950s.

*Chrysler flathead engine -
Wikipedia*

The Chrysler Flathead six-cylinder engine series was an L-head motor that was used in Chrysler vehicles from 1953 to 1960, and later used in applications such as airport tugs, baggage

handling carts and certain types of large stationary hauling machinery into the early part of the 1970s.

Performance Upgrades for the Chrysler Flathead 6 Engine

...

I have a 6 cylinder flathead engine for a Plymouth. It is the 23 smaller engine and I think it would be correct for 52 and earlier Plymouth and Mopars with this engine. The larger 25 that was used in the bigger Mopars is similar but length and flywheel mounting is different. This actually came out of a 1957 Dodge pickup but the previous owners had taken this engine

Modern performance FORD
FLATHEAD ENGINES are still
hot rodded today, with a
special land speed record
class for flathead engines.
The current record holder
achieves 700 hp (525 kW) and
300 mph (483 km/h). N Note
that on one pass the car
broke 300 mph (480 km/h) but
did not set a record. Two
passes have to be made in
order to break the record.

to appear through the 1970s, and the Power Wagon was produced for export markets until 1978. The 25-inch engine remains very much a part of the American collector-car scene.

*Chrysler's Long-Block
Flathead-Six | Hemmings*

Mopar flathead engines were manufactured at a time when the technology of engine oil was still primitive, by today's standards. Much of the wear restorers encounter upon disassembly is the result of the poor state of available lubricants. The oil we buy and use today is light years ahead of that available fifty years ago.
