Explore the forces at work when you try to push a filing cabinet. Create an applied force and see the resulting friction force and total force acting on the cabinet. Charts show the forces, position, velocity, and acceleration vs. time. View a Free Body Diagram of all the forces (including gravitational and normal forces).

1D Forces and Motion-Lab 4 I. Pushing on a File Cabinet Bob has been asked to push a heavy file cabinet down the hall to another office. It's not on rollers, so there is a lot of friction. At time t = 0 seconds, he starts pushing it from rest with increasing force until it

starts to move at t = 2 seconds. He pushes the file cabinet down the hall with varying amounts of force.

Go to the PhET Website (just google PhET to get there). Go to the simulations, click on "motion" and find the "Forces in 1-Dimension" simulation (it may take a few moments to load). Play with the simulation a bit to figure out how it works. Once you're comfortable with it, restore the default settings and . turn off friction

Create an applied force and see how it makes objects move. Change friction and see how it affects the motion of objects. Sample Learning Goals Identify when forces are balanced vs unbalanced. Determine the sum of forces (net force) on an object with more than one force on it. Predict the motion of an object with zero net force.

PhET Simulation: Forces in 1 Dimension. published by the PhET. This interactive simulation explores the forces required to move objects along a 1-D path. Users control the amount of force as they "push" objects of varying mass, from a book to a refrigerator. Friction and gravitational constants may also be changed.

Explore as forças atuantes quando você tenta empurrar um armário. Crie uma força aplicada e veja a força de atrito resultante e a força total atuando no armário. Gráficos mostrarão as forças, posição, velocidade e aceleração versus tempo. Veja um Diagrama de Corpo Livre de todas as forças (incluindo as forças gravitacional e normal).
