### Fungi Identification Guide Gratuit—trumpetmaster.com

Pluteaceae. Psathyrellaceae. Russulaceae. Strophariaceae. Tricholomataceae. Ascomycetes. For ease of use we have grouped all jelly fungi (heterobasidiomycetes) together. Similarly all bracket and crust fungi are also grouped, as also are the various puffballs, earthballs, earthstars and stillballs that, together with stinkhorns, are by tradition called gasteromycetes (even though there is no scientific justification for their being categorised together other than the fact that they all ...

### Fungi families picture gallery: identification guide

Yes, you can use our website as a mushroom identification app. Type fungusid.com in your browser, click 'choose file' to take a picture, and then hit 'identify'! What if I think the results are off? Click 'identify' again to give it another try. The App will analyze the image from another angle and thus may yield different results.
