Could Anti-gravity Really be Possible?*Gravity And Magnetic Methods For*

Gravity and magnetic geophysical methods are passive. They rely on no controlled sources but seek out naturally occurring variations in the earth's gravity and magnetic fields. For this reason, some military uses of these surveys have long included quiet detection of submarines and volatile unexploded munitions.

- Geophysical exploration techniques that employ both gravity and magnetics are passive. By this, we simply mean that when using these two methods we measure a naturally occurring field of the earth: either the earth's gravitational or magnetic fields. Collectively, the gravity and magnetics methods are often referred to as
