Toronto's Eco-Roof Incentive Program encourages the installation of green roofs and cool roofs on existing (and some new) buildings through financial incentives. The program offers \$100/m 2 for green roof 1 projects and \$2-5/m 2 for cool roof 2 projects. In addition, applicants who want to construct a green roof on an existing building may also be eligible to receive a Structural Assessment Grant, which provides up to \$1,000 to help offset the costs associated with determining whether the ...

Case Study - c40.org
In 2001, atop Chicago City Hall, the 38,800-square-foot (3,600 m 2) roof gardens were completed, serving as a pilot project to assess the impact green roofs would have on the heat island effect in urban areas, rainwater runoff, and the effectiveness of differing types of green roofs and plant species for Chicago's climate. Although the rooftop is not normally accessible to the public, it is visually accessible from 33 taller buildings in the area.

Green roof - Wikipedia
“The Music City Center has many sustainable features, including a green roof and a water reclaim tank so that excess rain water can be used for things such as flushing the toilets and site irrigation. In addition to these sustainable features, the Music City Center Team also envisioned installing solar panels.
